

The cloud is a more agile, cost-effective and disaster-proof way to scale your business. However, while public cloud providers guarantee the safety of your infrastructure, its down to you to protect your data. N2WS is a leading backup, disaster recovery and archiving solution for Amazon Web Services (AWS) and now includes support for Microsoft Azure Virtual Machines and disks. Manage and protect AWS and Azure workloads from a single console.

### CLOUD-NATIVE SOLUTION

N2WS is hosted in your AWS or Azure environment giving you complete control over your data. Data never leaves your cloud.

### COMPLIANT DATA PROTECTION

Eliminate the risk of downtime while keeping your data secure, available, and compliant.

### RAPID & RELIABLE RECOVERY

1-click disaster recovery gets you back up and running in less than 30 seconds for 100% up time.

## Why Choose N2WS Backup & Recovery for AWS?

### RAPID, GRANULAR DISASTER RECOVERY

Protect your cloud from ransomware, outage or data loss with near-zero RTO. Create disaster recovery sites around the world in a few clicks and leverage cross-account recovery for enhanced security.

### APPLICATION-CONSISTENCY, 100% UPTIME

Perform application-consistent backups without taking systems offline, with support for MySQL, MongoDB, PostgreSQL, SQL Server, Exchange, Active Directory, SharePoint, and SAP.

### AMAZON S3 REPLICATION

Protect static data on Amazon S3 by automatically syncing objects in Amazon S3 buckets across regions and accounts.

### MANAGE THE FULL DATA LIFECYCLE

Automate transfer of Amazon snapshots to Amazon S3 or Glacier/Deep Archive for long-term retention and cost savings. Leverage any Amazon S3 storage class, automatically delete snapshots during archiving, and recover individual files from Amazon S3. Use AnySnap Archiver to archive pre-existing snaps to cold storage.

### UPGRADED DR WITH RECOVERY SCENARIOS

Orchestrate recovery of an entire application or service. Pre-configure a set of resources, define order of recovery and bring workloads back in seconds. Schedule dry runs to improve DR planning and check for potential issues.

## Features at a glance:

### Backup and Recovery

-   Flexible policies and schedules
-  Backup & recovery of AWS volumes and instances
-   Backup & recovery of Azure VMs and disks
-  Snapshot explorer with file & folder-level recovery
-  Application-consistent backups
-  Sync Amazon S3 buckets automatically
-  Supports all AWS GovCloud regions
-  Capture & Clone VPC settings
-  File-level recovery from Amazon EFS

### Disaster Recovery

-   Rapid 1-click restore from any outage in seconds
-  Cross-region backup and disaster recovery
-  Cross-account backup and disaster recovery
-  Configure and schedule Recovery Scenarios
-  Supports custom encryption keys for DR
-  Cross-region disaster recovery for Amazon EFS
-  Enable additional checks with 'Secured DR Account'

### Cost Optimization

-  Monitor Amazon EBS backup spend with Cost Explorer
-  Monitor cost savings from your dashboard
-  Start/stop non-critical instances during "off" hours
-  "Zero EBS Snapshot" option for archived data
-  Archive data to Amazon S3/Glacier/Deep Archive
-  Intelligent, scalable worker instances
-  Track EBS volume usage and set threshold alerts
-  Import + immediately archive any EBS snapshots

### Onboarding & Admin

-  Easy install with a CloudFormation template
-  Designed for multi-tenancy and IAM support
-  Integrate existing tag schema with custom tags
-  CLI and RESTful API for custom integrations
-   Get custom alerts and reports
-  Technical support for all paid plans
-   Gain real-time backup insights and monitor activity
-  Integrate with 3rd party data tools like Splunk, Bocada, and Datadog

## N2WS supports the top core AWS services:

Amazon EBS

Amazon EBS

Amazon RDS

Amazon VPC

Amazon EFS

Amazon FSx

Amazon Redshift

Amazon DynamoDB

Amazon Aurora

Amazon Glacier

Amazon S3

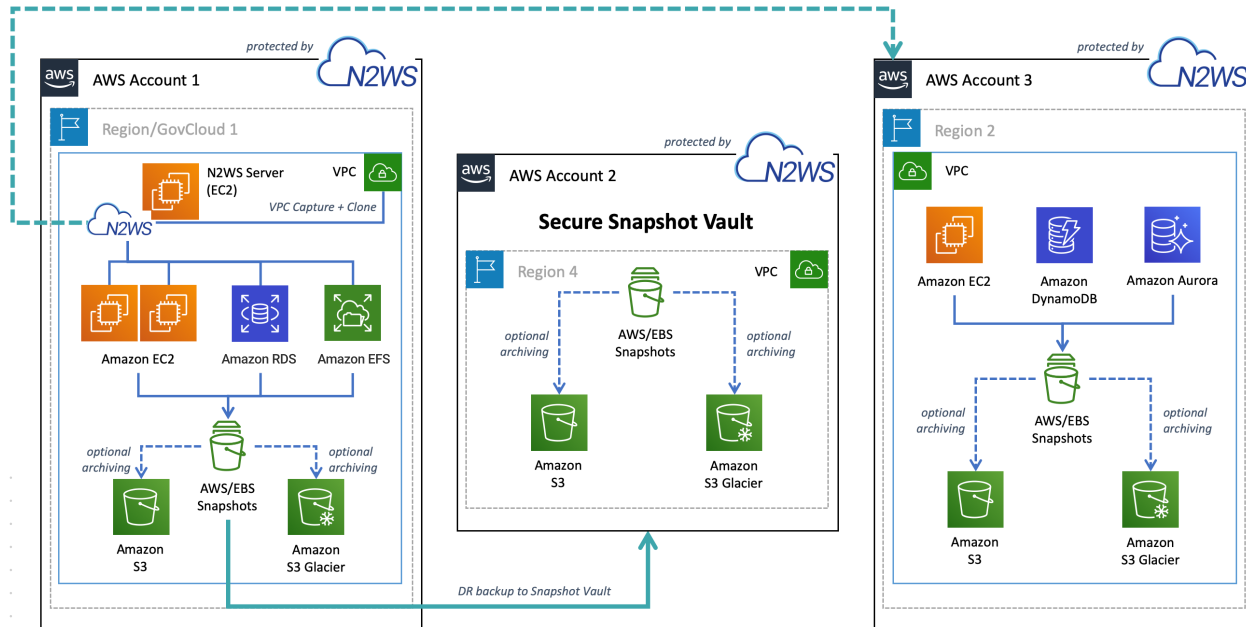

AWS Outposts

 This symbol indicates the feature is also available for Microsoft Azure workloads. N2WS Backup & Recovery version 4.0 is available in the AWS Marketplace. You can manage backup and recovery of AWS and Azure workloads from a single, user-friendly N2WS console.

# About N2WS

N2WS was founded in 2012 with the mission of providing enterprise-class data protection for production environments deployed in the public cloud and was **meticulously built from the cloud up** to meet the backup & DR requirements of the most demanding customers. Now N2WS is the leading enterprise-class backup, recovery, and disaster recovery solution specifically built for Amazon Web Services (AWS), which now includes support for Microsoft Azure.

## Let's talk:

N2WS is an enterprise tool-of-choice for backup & recovery, with locations around the globe. Keep your data safe and always available with near-instant disaster recovery and save up to 90% on long-term storage costs. N2WS Backup & Recovery is ready to download from the AWS Marketplace.
